Adjustment Key 747134

BEMIS SHOWER FEET & ACCESSORIES

Introducing Bemis shower tray feet, redefining precision and stability in shower tray installations. With adjustable heights from 53 to 93 mm and an optional extension up to a height of 178 mm, these feet guarantee seamless adjustments even in restricted visibility.

Featuring a large, ergonomic nut for effortless fine-tuning and a non-slip pad for secure tray support, Bemis sets a new standard for reliable and comfortable shower installations

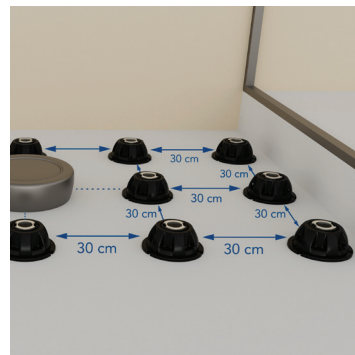

ADJUST UNDER LOAD

Easy to adjust under load, thanks to the tightening nut and adjustment key you can adjust even the hard to access corners.

FITS LOW TRAYS

With a minimum height of only 53 mm these feet can be used under all modern low shower trays.

EXTENDABLE HEIGHT

Need that extra bit of height? Extend the maximum height up to 178 mm with the easy click-on riser.

SECURE INSTALLATION

The soft, non-slip top provides extra stability during installation. It's recommended to maintain a distance of 30 cm between each shower tray foot for optimal support.
