Timeline (top)

Year	Event
1901	White Wagon Works the precursor to Bemis is incorporated.
1920	
1932	Bemis adds wood novelty furniture to the company's line of children's coaster wagons.
	The first wood toilet seats are made by Bemis.
1940	Introduction of Novel plastic hinges.
1950	Start of Contract Injection Moulding.
1965	Wooden toys and sporting goods are added to the Bemis product line along with a new wood/plastic composite toilet seat.
1971	Robotics enhances growth of Contract Injection Moulding.
1980	Bemis starts contract extrusion operations.
1987	Acquisition of Kelch Corp.
1988	Start of the European expansion in Burnley, UK.
1994	Further expansion of Europe with the acquisition of Carrara & Matta in Italy.
1999	Opening of the Monterrey, Mexico offices and warehouse.
2000	Opening of sales office in Hong Kong, China.
2012	Opening of EMEA Market & Business development office in Amsterdam.
2013	Consolidated European manufacturing.
2016	Acquisition of Ivanićplast d.o.o. in Ivanić Grad, Croatia.
2019	Acquisition of Dubourgel-Grange in Grenoble, France.

ABOUT US

For over 120 years, we've been all about a good place to sit. Today, we're an industry leader with global locations and our own manufacturing facilities, focusing on innovation for everyday life since 1901, today and tomorrow.

Our products offer all the necessary features for increased comfort, better hygiene, and excellent stability. They are functional, innovative and designed to meet the highest standards. To ensure the highest customer satisfaction, every product is extensively tested. We are proud to offer you high quality toilet seats.

Bemis has been producing toilet seats since 1932. Producing more than several million pieces each year, Bemis's efforts to improve sustainability and positively impact the community predate the creation of a formal ESG advisory body. For decades, teams at Bemis facilities around the world have been working to implement processes, materials, and practices that drive our deep commitment to environmental stewardship.

INNOVATION
Over 250 patents and more than 200 current products available.

QUALITY
Internal and external product testing, automated production, and manual inspection.

SUSTAINABILITY
Sustainable materials, FSC®-certified raw materials and use of recycled materials.
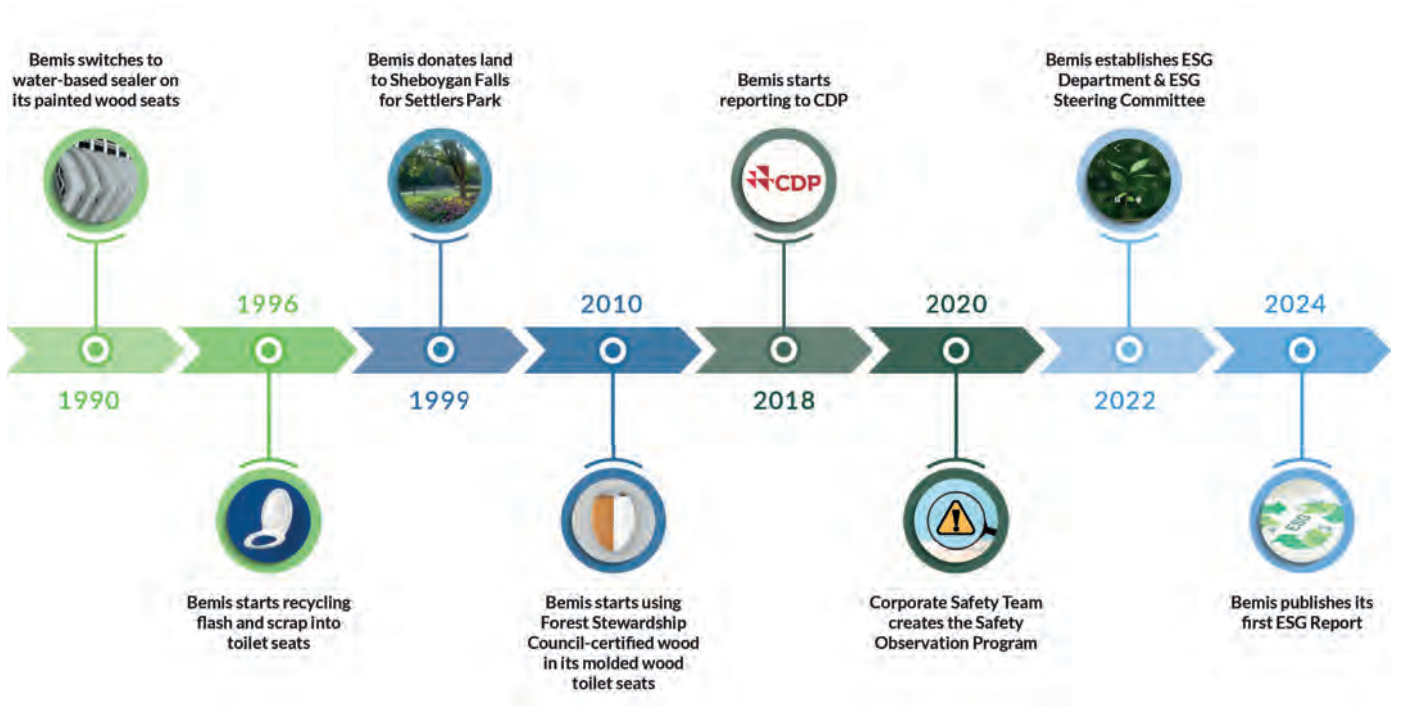

RESPONSIBILITY
We support local and international, social and environmental protection projects.

Sustainability/ESG Timeline

- **1990** — Bemis starts recycling flash and scrap into toilet seats
- **1996** — Bemis switches to water-based sealer on its painted wood seats
- **1999** — Bemis starts using Forest Stewardship Council-certified wood in its molded wood toilet seats
- **2010** — Bemis donates land to Sheboygan Falls for Settlers Park
- **2018** — Bemis starts reporting to CDP
- **2020** — Corporate Safety Team creates the Safety Observation Program
- **2022** — Bemis establishes ESG Department & ESG Steering Committee
- **2024** — Bemis publishes its first ESG Report

LOCAL PRESENCE, GLOBAL REACH

Our products are available worldwide: in Europe, North America, Asia, and the Middle East.

With six international production sites as well as offices and branches in several countries, we offer our extensive product range across almost all national borders.

"Local presence means being there for our customers at all times, taking their needs seriously, and being able to respond to market trends."

TOILET SEATS

INTRODUCTION

Bemis toilet seats are primarily made from three materials: Bemis moulded wood, thermoset, and thermoplastic.

These durable, functional, and easy-to-clean materials offer different features and benefits at different price points.

Every Bemis toilet seat is carefully crafted to ensure long-lasting comfort and stability. Learn more about our materials and the high-quality products we offer on the following pages.

BEMIS ULTRA-FIX®

Patented toilet seat fixing system

High-traffic areas are one of the biggest challenges for toilet seats. Toilet seats are often vandalized or run loose due to heavy use, costing time and money for replacement.
The patented Bemis Ultra-Fix® fixing system is designed to withstand the toughest demands and keep the seat in place.

The finned bushing eliminates the gap in the toilet mounting hole, preventing hinge movement. The one-piece fixing nut is corrosion resistant and developed to resist high pressure. The lower part of the fastening nut breaks off once the optimal torque has been reached. The toilet seat is now permanently mounted without wobbling.

Toilet seats with the patented Bemis Ultra-Fix® fastening system have undergone extensive testing and remain securely and firmly in place over time.

MOULDED WOOD TOILET SEATS

Our wooden toilet seats are made from a blend of wood flour and resin. 100% of the wood used comes from post-industrial, recycled materials from industrial wood processing.

In addition, we capture the wood dust generated during production (approximately 680 million tons per year) and feed it back into the process.

We also regrind our wood seat waste (approximately 1,360 million tons per year) and return it to the process.

The wood flour is mixed with resin and then pressed into the molds to form the rings and lids. The high-density material achieved through this process makes the finished seats durable, stable, and highly moisture-resistant.

These high-quality components are coated with water-based paints before assembly and then prepared for shipment to our customers.

Moulded Wood Advantages

+   Bemis moulded wood toilet seats are made from residual materials from industrial wood processing

+   The use of wood flour and the reuse of excess material means that virtually no waste is produced during manufacturing

+   In-house processing of wood into wood flour ensures a consistent high quality

+   The high-density material is durable, stable, and highly moisture-resistant

+   Coated with water-based paints

+   High-quality and hand-assembled

DUROPLAST TOILET SEATS

Bemis duroplast toilet seats are manufactured using a compression molding process. In this process, the urea raw material is shaped in the mould using pressure and heat.

During production, a non-porous surface is achieved, making the seats scratch- and heat-resistant, durable, and easy to clean.

Bemis duroplast toilet seats with antibacterial properties contain a biocidal product compliant with EU regulations, which inhibits bacterial growth.

Duroplast Advantages

+ Duroplast toilet seats are scratch- and heat-resistant

+ Non-porous surface with a ceramic-like appearance, durable and easy to maintain

+ Available in glossy and matte finishes in various colors

+ Duroplast toilet seats with antibacterial properties inhibit the growth of bacteria

BEMIS CLICK & CLEAN®

Take hygiene to the next level
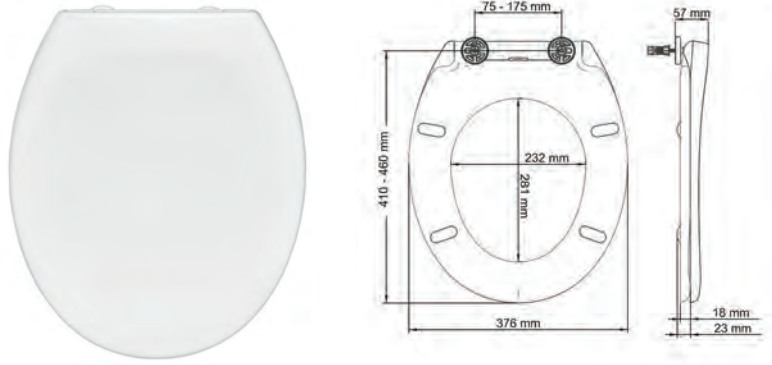

Achieving a hygienically clean toilet is often difficult, unpleasant and time consuming.

The take off system takes your cleaning routine to the next level.

The Bemis Click & Clean® quick release system allows you to quickly release and lift off the seat making it easy to clean the hinges, back of the ceramic and even the seat itself!

Simply open both ring and cover into an upward position and push the seat down to release and lift off (you will hear a light click).

Benefits
• The easiest way to clean
• Instant take off, no buttons
• Access all hard-to-reach areas
• The most hygienic solution

BEMIS
CLICK & CLEAN® SILENT

The silicone seal on both the seat ring and cover securely seal the toilet.

These silicone rings significantly reduce noise during the flushing process and, by creating a slight vacuum, improve flushing performance.

Toilet seats with the silicone seal help to significantly minimize the release of aerosols, odors, and splashes during use and flushing (when ring and cover are closed) improving bathroom hygiene. The antibacterial treatment of ring and cover inhibit the growth of bacteria.

BEMIS Click & Clean® seats with silent function support bathroom hygiene and overall well-being.
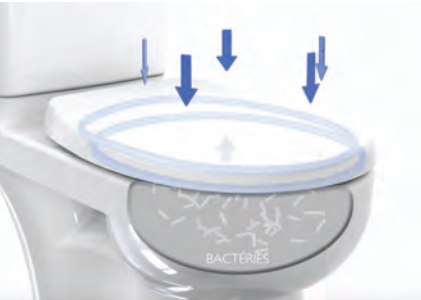

BEMIS CLICK & CLEAN® SILENT

THERMOPLASTIC TOILET SEATS

Bemis thermoplastic toilet seats made of polypropylene are manufactured to deliver a virtually unbreakable product that is versatile and suitable for any environment.

To produce colored seats, Bemis adds colour during the melting process to achieve uniform coloring throughout every layer of the product, ensuring that the color does not fade or change over time.

Polypropylene is a recyclable material, therefore, the rings and covers of Bemis thermoplastic toilet seats are 100% recyclable.

Advantages of Thermoplastic

+ Thermoplastic toilet seats are virtually unbreakable

+ Ideally suited for high-traffic areas

+ High resistance to chemicals, disinfectants, and aggressive cleaning agents

+ Ring and cover are 100% recyclable

TOILET SEATS MADE FROM RECYCLED PLASTIC

Sustainable
Recycled polypropylene can be recycled almost infinitely.

Recyclable materials from household collections
Bemis toilet seats made from recycled polypropylene are made from over 95% recycled materials from household waste collection.

Local manufacturing
Production takes place in our own factories in England, France, and Croatia. The seats are packaged in FSC®-certified cardboard boxes.

High quality material
Certified partners guarantee pure raw materials and the high quality of the plastic granulate

RECYCLED POLYPROPYLENE TOILET SEATS

95% Post-Consumer Material

In 2021, Bemis launched the first toilet seat made from recycled polypropylene. These plastic toilet seats from Bemis consist of 95% post-consumer recycled polypropylene.

The raw materials are collected through household recycling programs, processed by specialized partner companies, and then reused in the production process.

Why choose a recycled product?
The demand for plastic increases every year. By using products made from recycled materials, you help reduce this demand and thus conserve valuable resources.

MADE FROM RECYCLED PLASTIC

- Houseware
- Caps
- Crates
- Pails

Contains at least 95% recycled post-consumer material from pre-sorted plastic packaging waste.
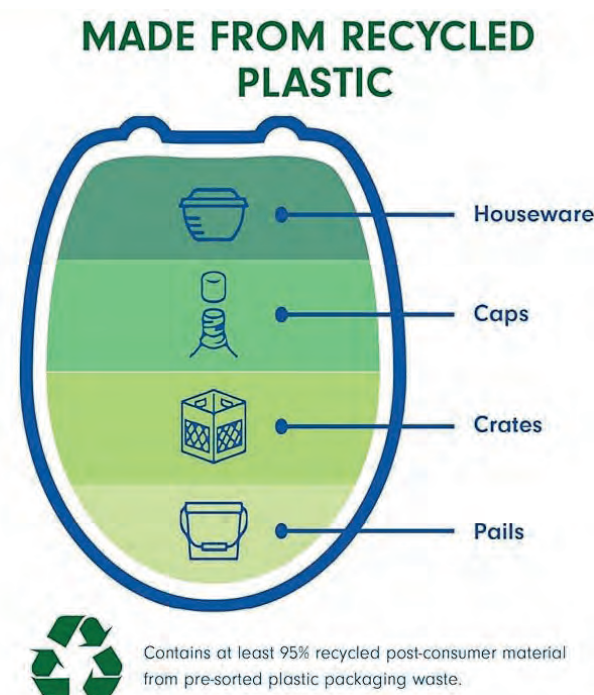

BUXTON ECO with patented Bemis Ultra-Fix® hinge fixing
2850ECO000

BEMIS PURE CLEAN®

BEMIS
PURE CLEAN®

Cleaning with water is gentler on the skin, more pleasant, and more hygienic than using toilet paper alone. Tap water contains none of the chemicals found in wet wipes.

For people with temporary or permanent impairments, a shower toilet seat can be a great aid in personal hygiene, as it combines the functions of a toilet and a water spray.

The Bemis Pure Clean® BB1000 is a shower toilet solution offering greater comfort and personal hygiene. Thanks to the intuitive control, you can adjust the water pressure, temperature, and nozzle position to create a personalized cleaning experience. All functions can be accessed via the remote control or side button.

BEMIS PURE CLEAN® BB1000

Legend:

- - Doesn't fit
- o Doesn't fit well, because of mismatch between contour ceramic and seat
- + Fits well
- ++ Fits

All specified fits are recommendations by BEMIS Ultra-Fix® based on internal testing.
The actual selection and satisfactory fit for the user are determined on-site by the installer and the customer.
All information is provided without guarantee. Errors and misprints are expressly reserved.

CARE INSTRUCTIONS

We want you to enjoy your BEMIS toilet seat for a long time. Therefore, please follow our care instructions! To ensure that the best seat in your home remains your favorite place for a long time, please treat it carefully. It will thank you with a long service life and a consistently pleasant sitting experience.

Excessively harsh cleaning agents can attack the surfaces of all toilet seats and cause discoloration.

Therefore, especially our wooden seats with water-based varnishes, only clean them with mild cleaning agents or a weak soap solution and a gentle cleaning cloth, such as a microfiber cloth.

Remove dirt as soon as possible and avoid the buildup of deposits over time.
